Science

- -Living and non-living things
- -Plants and their characteristics
- -Animals and their characteristics
 - -Matter and energy
 - -The five senses

Both

Classes are held full day, 5 days a week.

Students participate in physical education, art, music, library, computers, dance, and drama

Students learn social skills

Students deliver an awareness of school structure

Taught by experienced, certified elementary school teachers

> Students participate in small and large motor coordination activities

Early Kindergarten

This curriculum focuses on simplifying the Kindergarten curriculum.

Students are given many opportunities for social and coordination development.

Students are introduced to reading through letter/sound awareness.

Students learn about numbers and patterning through hands on activities.

Students are given many opportunities to develop their fine motor skills through art games.

Students practice their large motor skills through play, dance exercises, and games.
