Grades 6-12

Give Your Students Something New and Exciting This Year!

Thinking Like an Engineer

This exciting course includes interactive lessons, engaging hands-on activities, design challenges, and 3D design software that will give students a chance to challenge their innovative skills and practice thinking like an engineer.

3D SOFTWARE INCLUDED!

Browser based (nothing to download)

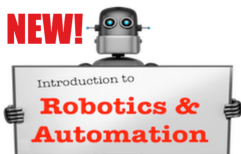

Thinking Like an Architect

In this exciting course, students solve problems related to buildings and structures. They learn how to use an architect scale, read blue prints, and use 3D software to design their own dream house. Lot's of engaging activities!

3D SOFTWARE INCLUDED!

Browser based (nothing to download)

Robotics & Automation

This exciting course introduces students to the modern world of robotics. Using interactive lessons and exciting hands-on activities, students will learn how to design, build and program a virtual robot.

3D SOFTWARE INCLUDED!

Browser based (nothing to download)

***Combine these courses into a 1 full credit, 160 hour experience your students will never forget!**
